

Utah Heat and Power Working Group

The Utah Heat and Power Working Group is dedicated to advancing opportunities for combined heat and power (CHP), waste heat recovery (WH), and industrial energy efficiency (IEE) in Utah.

Members meet on a regular basis and represent the interests and views of stakeholders from across the state. Stakeholders share information, knowledge, and expertise for the purpose of:

1. Building on the consensus of energy decision makers to identify the best information available,
2. Ensuring (and improving) coordination among the various segments of the energy community to expand the knowledge base in CHP, WH, and IEE,
3. Developing a shared commitment to achieve common aims, and
4. Working together in partnership to clarify issues, formulate strategies, and develop action plans.

Heat and Power

Waste Heat Recovery

Industrial Energy Efficiency

Membership is free and voluntary.

New members will be reviewed and approved by current group members.
